The Value of Natural And Organic Latex

Each rubber tree produces 15 grams of latex daily. A queen size natural latex core needs the daily output of 2500 rubber trees, spread over 12 acres of rubber plantation.

Interestingly, these 2500 rubber trees account for the removal of 143 metric tons of Carbon Dioxide from the environment in one year.

This is "Latex Green's" contribution to the environment. A sustainable and healthy environment through Natural Rubber Latex is our goal.

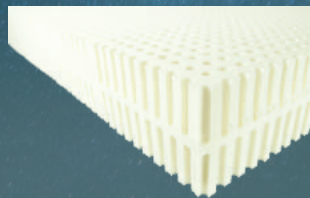

Our efforts will continue... How about yours?

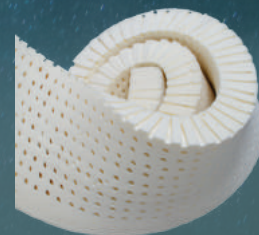

Pillows

cores

Toppers

We are the first certified organic latex foam manufacturer in the world.
