This process shows the quality and resilience of our products

Who We Are

Latex Green Pvt Ltd is a renowned brand name across the world as we are the **first certified organic latex foam manufacturer in the world.**

We are currently manufacturing both **organic and 100% natural latex** foam toppers, cores and pillows which are also **carbon neutralized.**

All the products under our manufacturing process complies with **ISO 9001-2015 certification** and the production facility is located in a dedicated export processing zone with excellent infrastructure facilities provided by the Board of Investment (BOI) Sri Lanka.

We are able to deliver products **high in quality** as we have access to the finest quality natural latex rubber from our strategic plantation partners in Sri Lanka.

Our Contribution to the Latex Industry

Organic Latex is the key ingredient used by us to produce organic foam. We made history by introducing the **first certified organic latex foam** manufacturing partnering with the control union.

We ensure that our latex products are indeed the **best in quality** as they are **organic, free of chemical fertilizers** and **growth regulators** and are **carbon neutralized**.

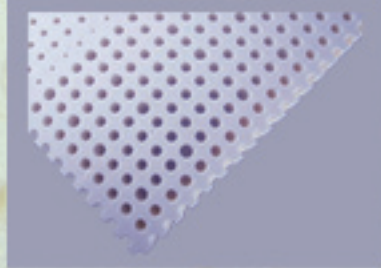

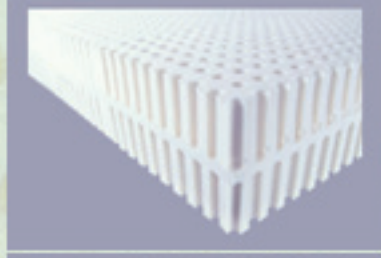

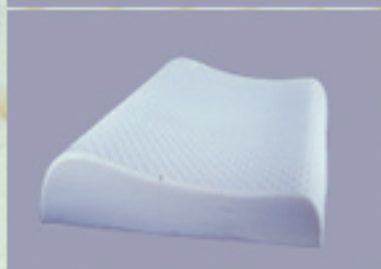

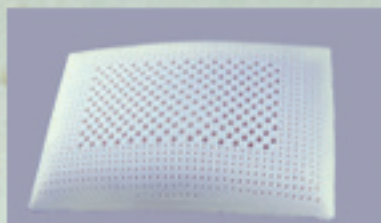

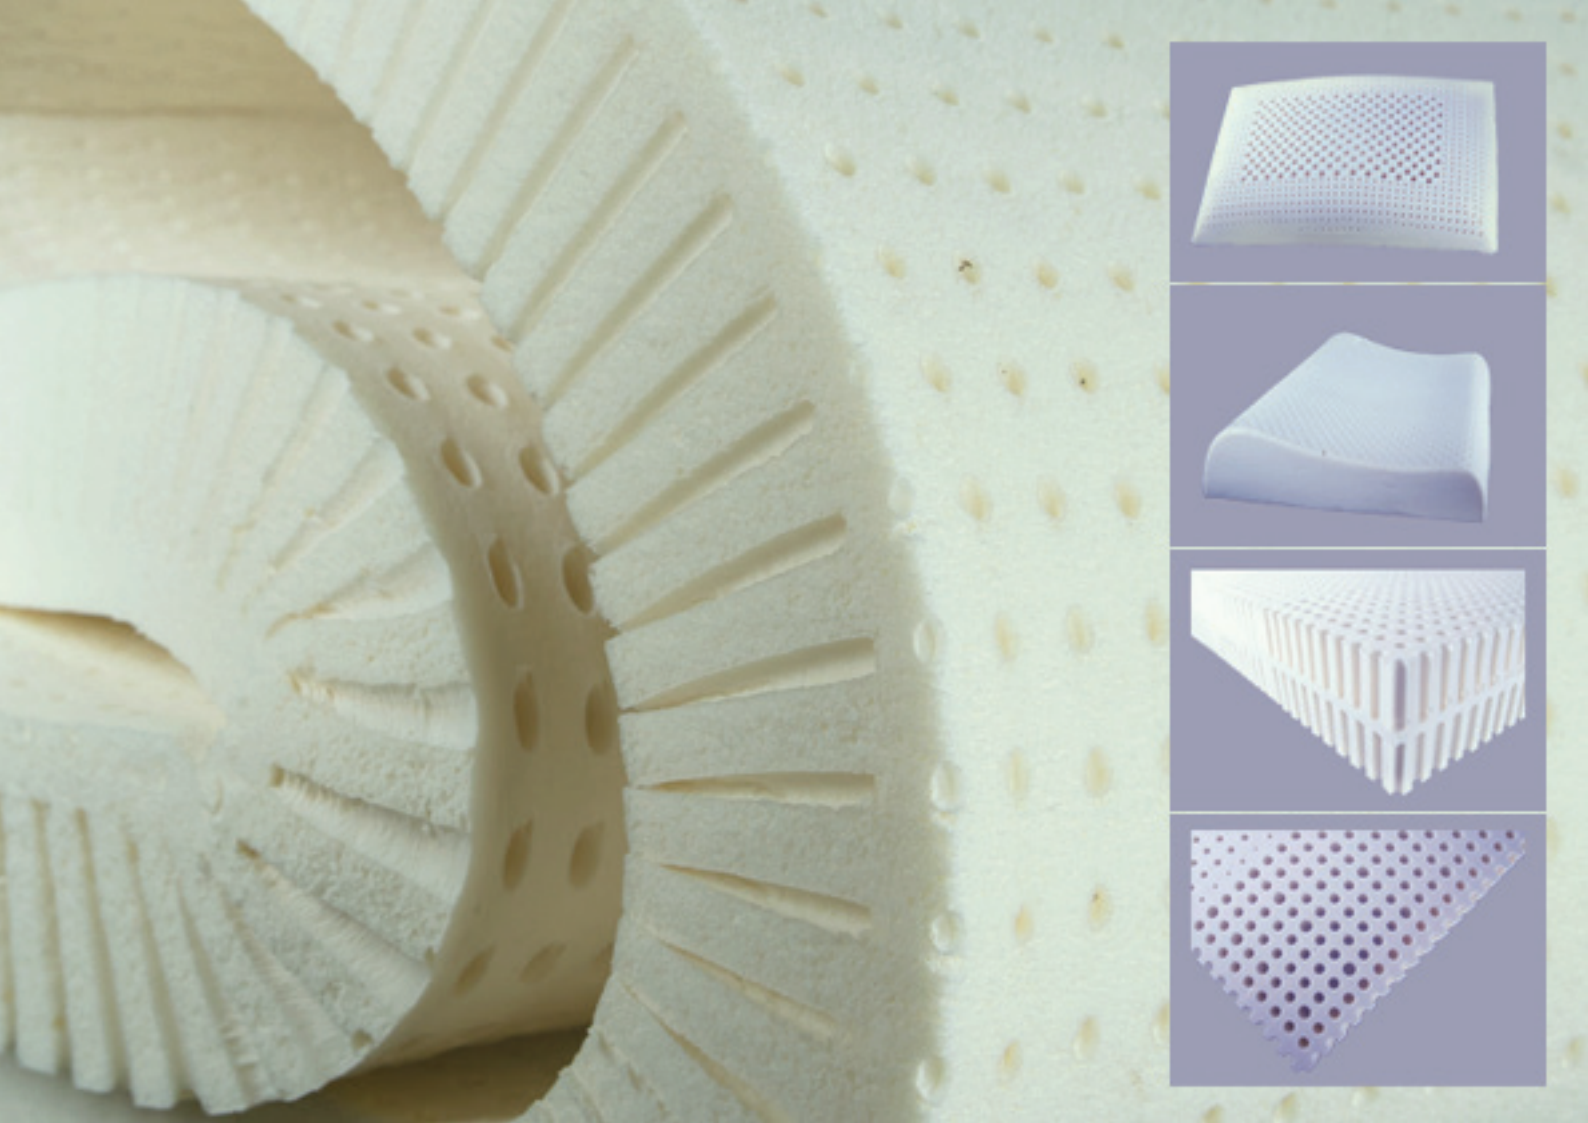

We are one of the few organizations which offer all these elements in products.

Positive Impact on Global Environment

Each rubber tree weeps 15 grams of latex daily. a queen size natural latex core needs the daily output of 2500 rubber trees, spread over 12 acres of rubber plantation. Interestingly, these 2500 rubber trees account for the removal of 143 metric tons of Carbon Dioxide from the environment in one year. This is "Latex Green's" genuine contribution to the environment. A green & healthy environment through Natural Rubber Latex is our goal.

Our efforts will continue...
How about yours?

Products

Mattress Cores and Toppers

Certified organic and 100% natural carbon neutralized latex cores and toppers

Our products are;

- Made with 100% natural and organic latex
- Carbon neutralized
- Mono zoned and designs in 3 and 7 zones
- Manufacture densities ranges from Extra soft to Extra Firm.

Pillows

- 100% natural and organic
- Carbon Neutralized
- Multiple designs and sizes are available with customized designs in premium quality

Detox Campaign

We as a socially and environmentally responsible company have taken the responsibility over the production chain to ensure toxic free production. We have voluntarily taken measures to be a step ahead than our industries expectations by making sure our organic and natural foam products are free from 11 chemical groups which are toxic.

The 11 priority chemical groups we have been tested on, identified to be toxic by the detox campaign are as follows

- Alkylphenols & ethoxylates
- Phthalates
- Brominated and chlorinated flame retardants
- Azo dyes releasing carcinogenic amines through reductive cleavage
- Organotin compounds
- Poly- and Perfluorinated chemicals
- Chlorobenzenes
- Chlorinated solvents
- Chlorophenols
- Short-chain chlorinated paraffins
- Heavy metals; cadmium, lead, mercury and chromium (VI)

Our Certifications

The first global standard for organic latex: the Global Organic Latex Standard (GOLS). It outlines requirements for latex products made from organic raw materials, as well as for material from non-organic origins.

Our organization assess our GHG (Green House Gas) emissions. Obtaining this certification claims that we are 'carbon neutral', because of the steps taken by us in reduction of carbon impacts and offsetting the remainder.
